I know that I can change the price in the admin panel but I have to update them from outside and I'm only allowed to change the currency once per day. How can I achieve this? A: You can make it so that the change happens automatically once a day. For that, go to `app/code/core/Mage/Directory/Model/Currency.php` and look at the `setAutoUpdate()` function. You should be able to modify this to your requirements. The function will look something like this `/** */ public function setAutoUpdate($update, $date = null) { $this->_update = $update; if (!$date) { $date = time(); } $this->_updated = $date; return $this; }` If you modify this to your needs, you should have the ability to call `setAutoUpdate(false)` when you need to set the auto update flag to false, and it will stop calling `setAutoUpdate()` for a certain interval of time, or from a specific date.
